*Ahead of the threat.™*

# *What is ISS Announcing?*

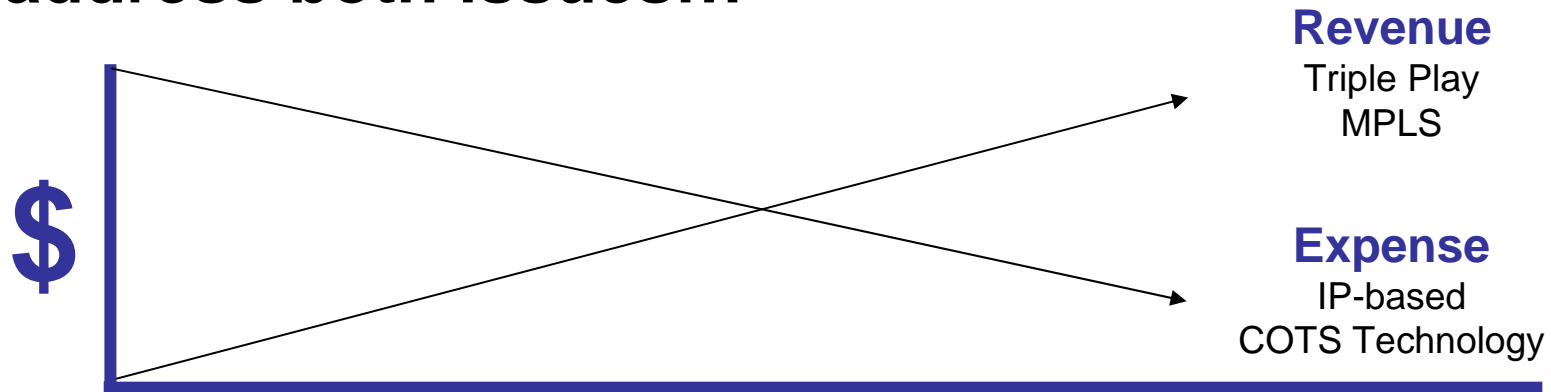

- 1. An Alliance with Crossbeam Systems as part of our “Powered by ISS” program.**
- 2. Availability of an industry-leading, carrier-class IPS product.**

# First, A Look at the Carrier Industry

- Carriers are battling both ends of the income statement

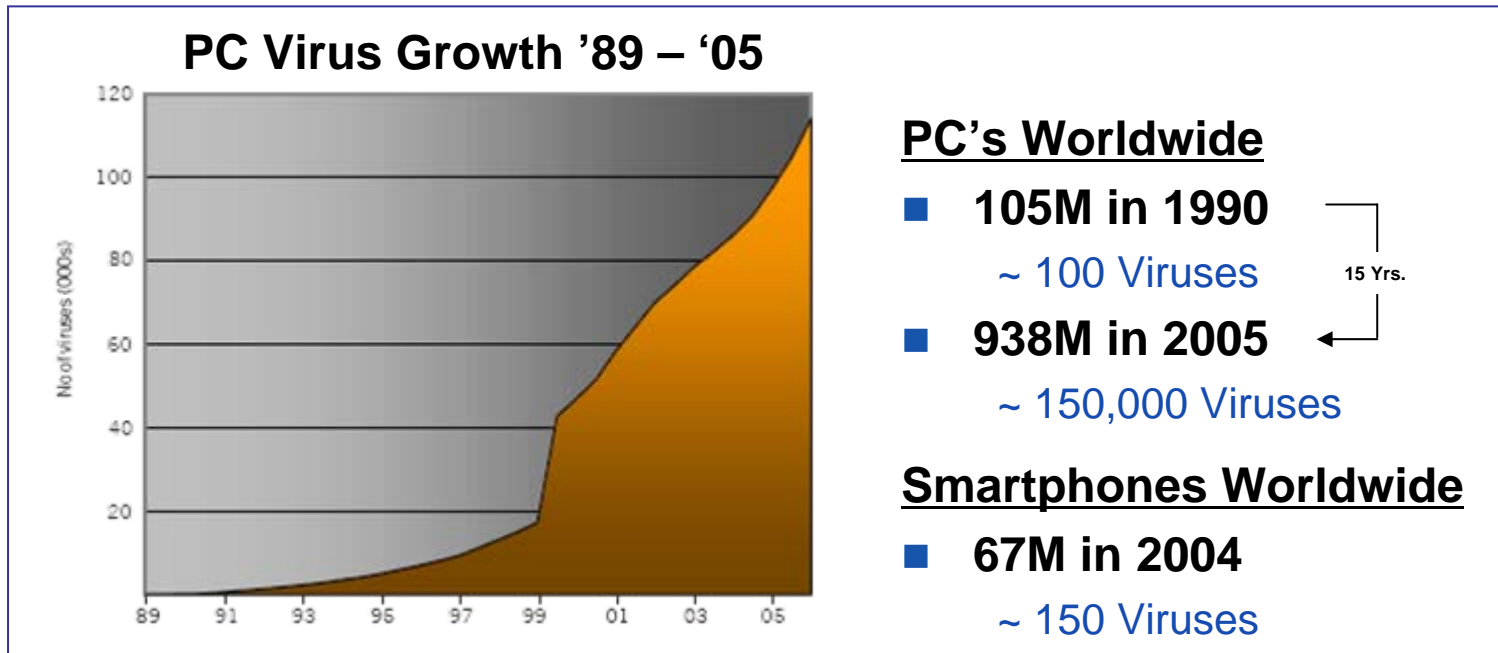

- IP-based NGN (Next Generation Network) projects address both issues...

# First, A Look at the Carrier Industry

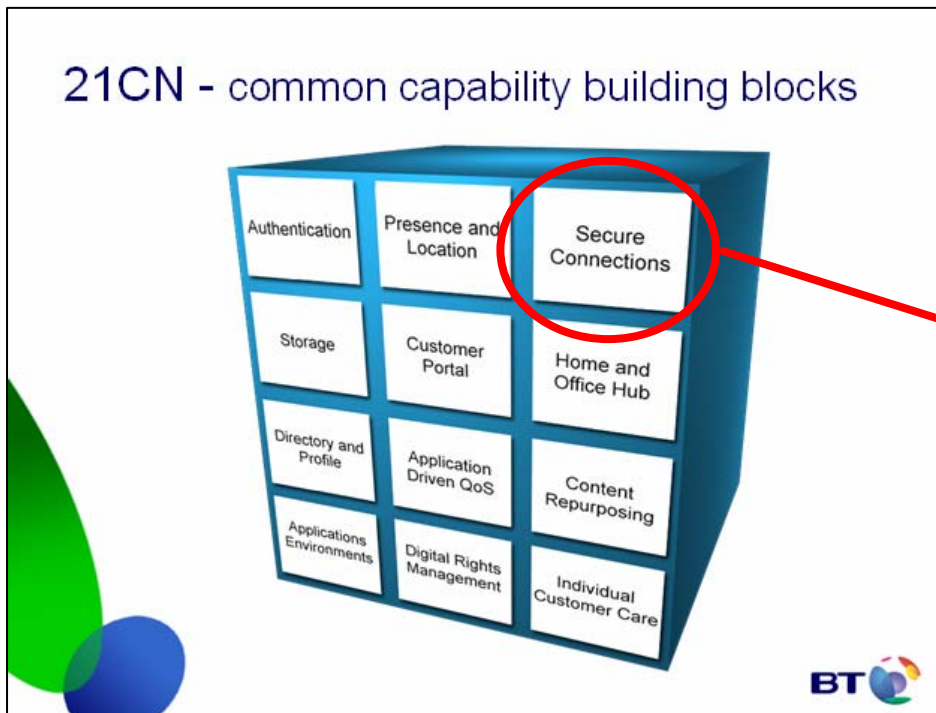

- IP-based NGN is not immune from security issues
- Smartphones as an example...

- Plus... VoIP, IPTV, MPLS, IMS, etc.

# Carrier Response

- Industry leading carriers are embracing security as a core requirement in NGN.

# Proventia IPS for Crossbeam

Industry leading Deep Packet Inspection for protocols that carriers rely on to deliver network and managed services.

Gartner

FROST & SULLIVAN

Industry leading platform sought after by carriers for its high availability, high performance and modular/flexible design.

Gartner

FROST & SULLIVAN

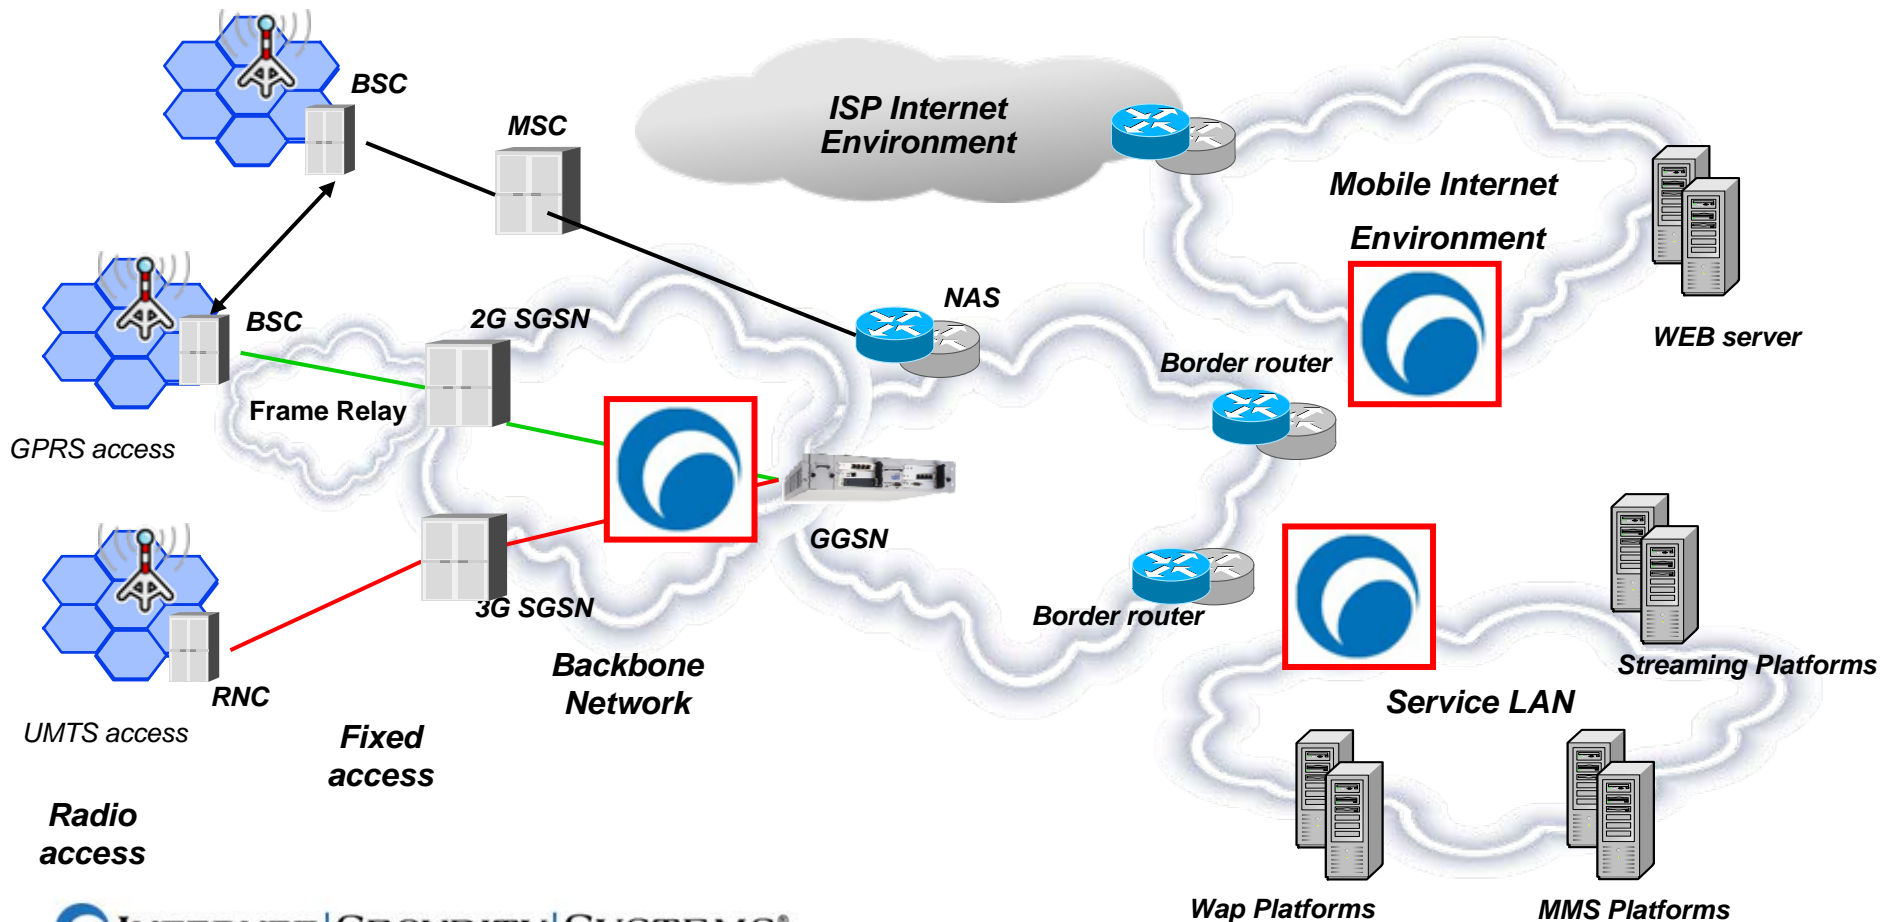

- Performance up to 1 Gigabit per APM with load balancing across multiple APMs for added throughput
- Protection for protocols like SIP, H.323, GTP + more than 140 others
- Centralized Management with policy sharing across multiple APMs
